FEASIBILITY AND VIABILITY

LOGICLEADS
STRATEGIZE • CONNECT • CONVERT

SMART INDIA HACKATHON 2026

FEASIBILITY

Social
- Direct income uplift for rural artisan communities.
- Preserves traditional craft livelihoods and cultural heritage.

Technical
- Leverages proven AI/ML pipelines and a flexible cross-platform mobile architecture.
- Utilizes production-ready, modular components to ensure rapid, stable deployment.

Economic
- Achieves low customer acquisition costs via existing government schemes and SHGs.
- Utilizes grassroots community networks for cost-effective user base expansion.

Operational
- Features an offline-first design for field-ready operations.
- Ensures seamless functionality and data synchronization in low-connectivity clusters.

REVENUE MODEL

GS — Government Schemes
MoSJE / DAY-NULM grants — seed funding & subsidy support for onboarding infra

% — Marketplace Commission
5–8% commission per verified sale, kept artisan-first and transparent

FT — Freemium Tools
₹99–299/mo tier for premium catalog, analytics & promotion boosts

B2B — Corporate & Bulk Sourcing
CSR tie-ups and curated artisan collections for corporate gifting

AI — Proven AI/ML & Mobile Stack
Vernacular NLP + on-device inference

₹ — Low Infra Cost, Cloud-Native
Pay-as-you-scale hosting model

VF — Voice-First, Low-Literacy UX
10+ regional languages supported

♥ — Direct Artisan Income Uplift
Up to 30% higher margin vs. middlemen

KEY RISKS → MITIGATION

Low Digital Literacy
Voice-first, vernacular UI with guided onboarding in 10+ regional languages

Rural Connectivity Gaps
Offline-first architecture with automatic background sync once online

Artisan Trust & Adoption
MoSJE-backed onboarding, verified success stories & community champions
